

TECHNICAL-COMMERCIAL FLYER · 2026

ISOPILOT

From documented compliance to continuous, verifiable, audit-ready governance.

AI-powered Governance, Risk & Compliance Operating System

ISO + GDPR + NIS2 + MOG 231 + Continuous Compliance + Evidence Intelligence + Audit + Risk/CAPA + AI Governance + Integrations + Automation

Product	Validation
UESE ITALIA S.p.A.	Dozens of Senior Specialist consultants with international experience.

isopilot.it · uese.eu

Why ISOPILOT is different today

Not a document repository: an operating layer connecting evidence, controls, risk, audits, documents, people, decisions and actions.

Compliance Control Center	Continuous Compliance
Cross-framework scores with clickable causes.	Persistent findings, owners, targets and escalation.
Evidence once, comply many	Audit Readiness
Reuse one evidence item across frameworks after validation.	0-100 score, Simulate Audit and Audit Copilot.
Risk & CAPA	Document Consistency
Heatmap, 5 Whys, Ishikawa and effectiveness verification.	Impact preview and governed Smart Update.

Specialist workspaces

- ISO/IEC 27001 ISMS, ISO management systems and multi-standard Master Project.
- GDPR: RoPA, DPIA, LIA, Art. 28, breaches, transfers and retention.
- NIS2: cyber risk, assets, supply chain, incidents, continuity and evidence.
- MOG 231: offence risk assessment, protocols, Supervisory Body, flows and whistleblowing.

AI grounded in real organizational context

Agents must not guess compliance: they work on tenant data and make the sources they use verifiable.

11 AI Compliance Agents	Knowledge Graph
ISO, Audit, Evidence, Risk, Document, Regulatory, MOG231, GDPR, NIS2, SGSI, AI Act/ISO42001.	Person → role → process → risk → control → requirement → document → evidence → audit → CAPA.
Regulatory Change	AI Governance
Institutional sources, changes requiring qualification and impact analysis.	CONFIRMED / INFERENCE / TO VALIDATE, confidence, provider/model when available.

Enterprise operations

Consultant Workspace	Executive Board
Client portfolio, issues and Client Health Score.	Top risks, compliance trend, audit posture and PDF reporting.
Integration Hub	Automation Builder
Signed webhook + Generic HTTPS REST + Evidence Inbox.	IF/THEN for tasks, notifications and webhooks; no automatic approvals.

Why choose Enterprise

Market-ready because it reduces workload without reducing control

Less duplication	More auditability
Shared evidence, shared controls and Master Projects reduce repeated work.	Sources, owners, revisions, findings and CAPAs remain traceable.
Faster execution	Stronger European context
Autofill, drafting, impact analysis, search and automation reduce manual work.	ISO + GDPR + NIS2 + MOG231 in the same ecosystem.

Produced and distributed by UESE ITALIA S.p.A.

ISOPILOT is produced and distributed by UESE ITALIA S.p.A., a leading Italian company in management systems, compliance and cybersecurity services, and is developed and validated with contributions from dozens of Senior Specialist consultants with international experience. The platform supports professional work but is not a certification body and does not guarantee audit or certification outcomes.
